

# Aveiro Moliceiro Tour

10<sup>th</sup> May 2014

(Afternoon)

The charming City of Aveiro is known as the “Portuguese Venice”, crossed by water canals where you can enjoy a trip on traditional boats “Moliceiros” while tasting the local sweets “Ovos-Moles”.

The Moliceiro boats are one of the major highlights of Aveiro ria (drowned river valley). Joining a moliceiro trip for a tour around the city is the perfect way to spend the afternoon in Aveiro.

Your Aveiro boat trip will begin in the centre of the city, a few metres from the square on which the fish market is located. The market dates back many years, although its current building is relatively new and benefits from an attractive glass design, which provides lovely views of the waters behind the traders selling their daily catch. This provides a real reminder of Aveiro’s marine agricultural heritage.

From here, your moliceiro trip will weave you through the waterways that radiate from the centre of the city. Lined with a mixture of former fishermen’s houses and grand buildings, many of which are built in faithful art nouveau style, the canals are a festival of colour. Brightly coloured azulejos (hand-painted Portuguese ceramic tiles) jump out at every turn, cladding the impressive façades.
